Subject: San Jacinto Site - Shallow Alluvial Ground Water at the Southern Impoundment
Date: Friday, June 06, 2014 10:08:00 AM
Attachments: [Draft Remedial Investigation Report Addendum 1 11212013.pdf](#)

Stephen,

As we discussed, I would appreciate TCEQ's assessment of the classification of the shallow ground water zone in the Southern Impoundment area of the San Jacinto River Waste Pits Superfund Site. FYI, the results of the ground water salinity and discharge capacity testing are included in the attached Draft RI Report Addendum, Section 2.3.2, p. 9.

Thanks,

Gary Miller
